

ROOT BARRIER C3

JAPANESE KNOTWEED  
MEMBRANE

# CASE STUDY

*SSI Environmental / Jons Civil Engineering*  
Naas Bypass, County Kildare, Dublin, Ireland  
January 2018

This project saw Jons Civil Engineering install Root Barrier C3 along side the Naas Bypass, Country Kildare to control a Japanese Knotweed infestation.

The project used 3,700m<sup>2</sup> of Root Barrier C3, in conjunction with 60 reels of Hy-Tex Root Barrier C3 Lapping Tape to seal joints and laps.

The site urgently required the Root Barrier C3 to avoid delaying the project but thanks to our large storage facilities, located in Ashford, Kent, and reliable carriers, we were able to supply the goods direct to site within 4 working days.
