VERSIWALL

## CASE STUDY

*Garden Club London - RHS Chelsea Flower Show  
May 2018*

This 6m<sup>2</sup> living wall was built using our VersiWall GP and used as part of an award winning exhibition showcased at the RHS Chelsea Flower Show 2018.

The 'Urban Flow Garden' created by Tony Woods MSGD MBALL, director of garden design service *Garden Club London*, approached us wanting to use our vertical wall tray as part of his exhibit as he could see how versatile and easy to use it was. This proved the right decision for Tony and his company, as they commented that the system was very simple to install and they were able to create their stunning vision of an edible living wall very quickly.

This was further proven as the showpiece went on to win multiple awards at Chelsea Flower Show, with it being awarded the 'Best Space to Grow Garden' award along with a gold medal award given as well.
