VERSIWALL

## CASE STUDY

*Garnteg Primary School - Educational Edible Living Wall*  
March 2018

This 90m<sup>2</sup> living wall was built onto a concrete retaining wall at Garnteg Primary School in Wales using our VersiWall GP. It was situated immediately outside the classroom windows in this instance, and transformed an unsightly area of the school into a visually stunning showpiece.

Whilst being extremely eye-catching, it is also used for educational purposes, as the pupils actively participate in the planting of the trays on the wall.

The feedback from the school was remarkable, they highlighted how beneficial it was for the children to get involved with nature and being outdoors together all contributing to the construction of the living wall.
