

Protective Washers

Our protective washers are used as part of the fastening system to fix a variety of materials to wooden stakes. The washer spreads the load of said material on to the fixing screw or nail to prevent tearing. These are commonly used for our Ecofender™ Newt Barrier sheets & Terrastop™ Premium Silt Fences to attach posts. The washers should be used in conjunction with our clout nails.

Delivered in bags of 500.

Features/Benefits:

- Used for our Ecofender™ Newt Barrier sheets to attach posts.
- Used for our Terrastop™ Premium Silt Fences to attach posts.
- Used in conjunction with our clout nails.
