

Metal Fixing Pins

We supply a wide range of metal fixing pins to reliably anchor our fabrics in diverse ground conditions.

The 150mm long, "U" shaped 3mm diameter plain wire staples are the standard fixings for our range of biodegradable erosion control blankets and weed control fabrics, while the heavier 4mm diameter 200mm long "U" shaped, and 300mm long "J" shaped, are recommended for friable soils or hard/stony ground.

150mm long "U" shaped, and 300mm long "J" shaped staples made from 6mm diameter ribbed rebar are similarly designed for anchoring our GrassMesh range in a variety of ground conditions.

Custom sizes to suit project specific requirements are also available.

Features/Benefits:

- Wide range of metal fixing pins available
- Used with our biodegradable erosion control blankets
- Used with our weed control fabrics
