VERSIWALL

## CASE STUDY

*National Gallery Singapore  
1 St. Andrew's Rd Singapore*

Stainless steel pilasters were bolted directly to the wall to enable VersiWall® GM (VGM), each containing a geotextile bag filled.

Pre-planting of the VGMs in a controlled nursery environment prior to installation ensured that the selected plants were firmly established and orientated vertically. An automated irrigation system installed supplies water and nutrients at specific times to the green wall.

The entire project utilised a total of approximately 1,300 modules establishing 460 square metres of vertical greenery.
