VERSIWALL

CASE STUDY

*West Coast Plaza
Singapore*

Anchoring pilasters and a drip irrigation system to deliver water and nutrients to the plants were installed onto the 4 wall panels.

Pre-planted VGMs, each comprising a geotextile bag filled with lightweight planting media and encased in metal support frames were mounted onto the pilasters.

Artificial lighting was installed to supply the light source for sustaining plant growth in an indoor environment and a shallow metal trough placed beneath each wall to collect and drain away excess water.
