VERS WALL

CASE STUDY

Private Residence at Shelford Road
Singapore

To facilitate easy mounting of VGP Trays, welded wire mesh panels were secured with bolts along the entire length of the retaining wall.

In-situ planting of the VGP Trays with lush and colourful plants was carried out and the VGP Trays hung onto the wire mesh according to a predetermined design. Inadvertent dislodgment of the VGP Trays by inclement weather or public mischief was prevented by insertion of anti-lift arms into the hooks of the trays, effectively locking the trays to the wire mesh.

The ease of installing VGP Trays allow for design flexibility to create eye-pleasing living walls.
